SUMMARY

Students often struggle to manage study schedules, assignments, internship tasks, and exam preparation. Many students rely on multiple tools, making it difficult to stay organized and productive. StudyBuddy is designed to provide a centralized platform where students can plan their studies, track progress, and receive AI-powered assistance. To design a user-friendly mobile application that helps students improve productivity, manage academic responsibilities, and maintain consistent study habits.

PROJECTS

StudyBuddy | Mobile App UX Case Study

- Designed a user-friendly mobile application to help students improve productivity, manage academic responsibilities, and maintain consistent study habits.
- Research was conducted among engineering students to understand common academic challenges.
- Key findings: Poor time management affects productivity; students frequently miss assignment deadlines; managing studies and internships simultaneously is challenging; users prefer a clean and simple interface; progress tracking and reminders increase motivation.
- User needs identified: Easy task management, study planning tools, progress tracking, smart recommendations, minimal and intuitive interface.
- Created user flow: Splash Screen → Login → Dashboard → Study Planner → AI Assistant → Profile.
- Developed low-fidelity wireframes for Login Screen, Dashboard Screen, and Study Planner Screen.
- Designed high-fidelity prototype in Figma including Splash, Login, Dashboard, Study Planner, AI Assistant, and Profile screens.
- Defined design system: Primary color Purple (#5B4CF7), Secondary color White (#FFFFFF), Accent color Light Gray (#F5F5F5), typography (Poppins Bold/Regular), and components (Primary Buttons, Input Fields, Progress Cards, Navigation Bar, Task Cards, Profile Cards).
- Applied clean and minimal design approach to reduce cognitive load and improve usability.
- Conclusion: StudyBuddy combines study planning, progress tracking, and AI-powered assistance within a single platform to help students stay organized and achieve learning goals efficiently.
